EasyCut PW-1515/1520-S

Qtec has developed a sliding tabel for the EasyCut machine. The advantage with a sliding tabel is the possibility to remove parts and place new material on one of the tabels at same time the machine cuts on the other tabel.

The switch between to two tabels is semi automatic, operator controlled, driven by spindel or belt.

The machine is available with mecanical shield or light barriers.

	PW-1515-S	PW-1520-S
Cutting area	1500x1500	1500x2000
Machine Dimensions	6400x2650x1900	7900x2650x1900
